Existing

An aerial photograph showing a proposed road alignment, labeled 'Eastern Alignment', running through a rural landscape. The alignment is a light-colored, straight line that curves slightly to the right in the upper half of the image. It passes through various fields, including large green cornfields and smaller green pastures. A small town or village is visible in the lower-left quadrant, with several buildings and a parking lot. A river or stream flows through the landscape, crossing the alignment twice via bridges. The river is dark and winding, with some areas of exposed sand or silt. In the background, there are more fields and a line of trees. The overall scene is a mix of agricultural land, small-scale development, and natural features.
